

Application No.: 10/695,806

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph 13 on page 4 as follows:

FIG. 1 FIG. 1A illustrates an operating environment for an embodiment of the present disclosure.

Please insert the following new paragraph after paragraph 13 on page 4:

FIG. 1B illustrates an operating environment for an embodiment of the present disclosure.

Please insert the following new paragraph after paragraph 29 on page 8:

The embodiment shown in FIG. 1B includes a displacement measurement device 140 operatively coupled to the signal analyzer 150. The displacement measurement device 140 is configured to detect engine block movement relative to a stationary structure, such as the cowl 130. As described above, the cowl 130 is part of the body of the vehicle 115 and represents a stationary or fixed mount point with respect to movement (or displacement) of the engine 110.
